Senior Product Manager and former Solutions Architect with 15+ years of experience building scalable enterprise AI platforms, developer tools, and data architectures. Proven track record leading zero-to-one developer launches (ADK, Agent Garden), productizing complex research into enterprise guardrails, and authoring developer documentation adopted by over 1.5M engineers globally.

PROFESSIONAL EXPERIENCE

Product Leader (AI Agents and Database Engineering)

Google — Jan 2023 - Present

- Directed **technical product strategy** for the Agent Development Kit (ADK) infrastructure, owning zero-to-one execution for Vertex AI Agent Garden (40k monthly visitors) and standardizing high-scale developer sample architectures (adk-samples, 6k+ GitHub stars) to accelerate enterprise agent building.
- **Led cross-functional technical content strategy** for global "5 Days of AI" initiative (1.5M registrants, 25K Day-1 livestream viewers); directed 40+ contributors across Core, Google DeepMind, OCTO, and Cloud AI to produce 5 published technical whitepapers.
- **Productized NL2SQL data architectures with integrated caching and dynamic schema extraction**, establishing enterprise-grade security and governance frameworks to prevent data leakage and mitigate risk across a $200M customer pipeline.(Solution, Blog, Walk through)
- Defining the multi-year product vision to democratize agent-building, leading to the launch of Agent Garden and the adk-samples framework. This was a Zero to one launch.
- **Partnered with Cloud AI Research to productize research models** (SQLPaLM, Golden SQL, Schema RAG) for enterprise alpha customers, establishing developer-facing agent primitives and accelerating the research-to-enterprise deployment cycle by 2 quarters.

Customer Engineer (AI)

Google — Jul 2017 - Dec 2022

Helping Enterprises with their Innovation journey, showcasing the value of GCP, handle objections in a constructive manner and challenge customers on where they should be focusing their efforts

- Drove 120% increase in product adoption by acting as technical advisor to enterprise developers throughout prototyping, architecture review, and production rollout; directly resolved integration friction for a US Top-20 enterprise biller.
- One of the top 15 in East to complete ML Certification and Data Engineer Certification
- Worked closely with a Top-20 biller in the United States responsible for NLP use cases

AWS Solutions Architect

DXC — Jan 2015 - Jan 2017

- Architected dxc.technology's AWS deployment. This was an on prem to cloud workload and vital for the new brand launch
- Partnered with key decision-makers to analyze the benefits of integrating AWS into our existing on-premises and private cloud environments.

Performance Solutions Architect

DXC (Contract to Fulltime) — Apr 2007 - Apr 2015

ACCOMPLISHMENTS

Generated **$600M** enterprise pipeline as Product & Technology Leader for Generative AI, defining strategy across 3 product portfolios and launching 2 scalable enterprise solutions.

Increased platform API & service consumption by **150%** by driving developer enablement and production adoption across strategic enterprise accounts.

Led the AI Agent White paper work stream for 5days of AI with **1.5 million registrants,** curating and contributing to 5 whitepapers and hosting a 5-day Q&A session.

Pioneered DX & Agentic Standards, contributing to the Model Context Protocol (MCP) Database Toolbox design.
